

S.ID.A.1: Dot Plots

1 The dot plot below shows the number of goals Jessica scored in each lacrosse game last season.

Which statement about the dot plot is correct?

- 1) mean > mode
 - 2) mean = median
 - 3) mode = median
 - 4) median > mean
- 2 The dot plot shown below represents the number of pets owned by students in a class.

Which statement about the data is *not* true?

- 1) The median is 3.
 - 2) The interquartile range is 2.
 - 3) The mean is 3.
 - 4) The data contain no outliers.
- 3 Different ways to represent data are shown below.

Which data representations have a median of 2?

- 1) I and II, only
- 2) I and III, only
- 3) II and III, only
- 4) I, II, and III

4 Given the following data set:

65, 70, 70, 70, 70, 80, 80, 80, 85, 90, 90, 95, 95, 95, 100

Which representations are correct for this data set?

- 1) I and II
 - 2) I and III, only
 - 3) II and III, only
 - 4) I, II, and III
- 5 Student scores on a recent test are shown in the table below.

85	96	92	82	90
90	88	95	85	88
90	87	96	82	85
92	96	85	92	87

On the number line below, create a dot plot to model the data.

State the median test score for the data set.

S.ID.A.1: Dot Plots**Answer Section**

1 ANS: 2

$$\text{mean: } \frac{3(0) + 3(1) + 4(2) + 5(3) + 2(4) + 2(5) + 1(6)}{3 + 3 + 4 + 5 + 2 + 2 + 1} = \frac{50}{20} = 2.5, \text{ mode: } 3, \text{ median: } \frac{2+3}{2} = 2.5$$

REF: 062416ai

2 ANS: 3

median = 3, IQR = $4 - 2 = 2$, $\bar{x} = 2.75$. An outlier is outside the interval $[Q_1 - 1.5(\text{IQR}), Q_3 + 1.5(\text{IQR})]$.

$$[2 - 1.5(2), 4 + 1.5(2)]$$

$$[-1, 7]$$
